

4ml Screw-Top Vials and Caps for Waters Wisp Autosamplers and Sample Storage

The high quality 4mL Screw-top Vials, available in Clear and Amber glass, combined with pre-assembled Open-Top PP Caps & PTFE/Silicone Septa, are the ideal choice for use with the old Waters Wisp Autosamplers

The vials and caps are fully compatible with Water's original ones. Use the cross-reference to Waters original p/n, provided in the table.

Due to their wide 13mm neck opening and the adequate 4ml capacity, they are the ideal choice for Sample Storage in Pharma, Food & Chemicals industry.

Combined with the Closed PTFE lined, Screw Caps can be safely used for long term storage of any type of sample, even the most aggressive ones.

Chrom4 offers also vials with graduation and write-on patch, making sample identification and measurement easy.
